**EXAMINER'S ACTION**

Art Unit: 2201

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 35-38, drawn to a control system useful in outdoor environments, classified in class 340, subclass 870.26.
  - II. Claims 39-40, drawn to a control apparatus for a well tool, classified in class 340, subclass 854.3.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an above ground communications system which is limited to a frequency modulation system but not limited in its range. Group II is limited to a well bore communication system with defined power parameters but which is not, however, limited to a particular modulation system, ie. it could use an amplitude modulation system instead of the frequency modulation system of Group I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is (703) 306-4151.
